MATEUS CORCINI DA SILVA

Security Analyst | SOC / Blue Team | Incident Response

Paraná, Brazil · open to remote | mateucorcini991@gmail.com | linkedin.com/in/mateus-corcini | github.com/Viscond-Rosfield

SUMMARY

IT professional with 5 years of experience, currently performing security monitoring, alert triage and incident response (SOC Tier 1) with Microsoft Defender, Netskope and FortiGate. Experienced in investigating anomalous sign-ins and suspicious traffic through log correlation, and in managing identities in Active Directory and Entra ID under least privilege. Strong background in Windows and Linux infrastructure, hardening and endpoint management with Intune. Pursuing a postgraduate degree in Cybersecurity, with SOC training (IBSEC, Cisco) and ISO/IEC 27001:2022. Seeking a SOC Analyst / Blue Team role.

TECHNICAL SKILLS

Security operations: Microsoft Defender for Endpoint / XDR, Netskope, Wazuh (SIEM), alert triage, log analysis, incident response (NIST), MITRE ATT&CK

Identity and endpoint: Active Directory, Microsoft Entra ID, Microsoft Intune, IAM and least privilege, Windows and Linux hardening

Networking: FortiGate, VPN, TCP/IP, Wireshark, Nmap, traffic analysis

Systems and cloud: Windows Server, Linux (Red Hat, Ubuntu), AWS (basic), ITSM / ticketing

Frameworks: NIST CSF, NIST SP 800-61, ISO/IEC 27001:2022, LGPD (Brazil's GDPR), MITRE ATT&CK

Scripting and data: SQL (intermediate), Bash, Python (basic), C++ (basic)

Languages: Portuguese (native), English (technical: documentation, CVEs, threat intel, runbooks)

EXPERIENCE

IT Analyst (Security / SOC Tier 1) — Gowd Apr 2025 – Present

- Monitor and triage security alerts in Microsoft Defender and Netskope, prioritizing by severity and escalating critical incidents within SLA.
- Perform initial analysis, classification and escalation of security incidents based on severity and impact, documenting each case in the ITSM platform.
- Investigate anomalous access, authentication attempts and policy-violating browsing by correlating Entra ID, Defender, Netskope and FortiGate events.
- Analyze FortiGate firewall events to identify suspicious traffic patterns and support blocking decisions.
- Review Active Directory and Entra ID permissions under least privilege.
- Enforce compliance and hardening policies on devices through Microsoft Intune; support secure remote access over VPN.

IT Analyst — Aiqfome Apr 2022 – Apr 2025

- Administered Windows and Linux servers with a focus on security and high availability.
- Applied hardening to Linux and Windows servers, reducing the attack surface of managed environments.
- Monitored the network and helped identify and mitigate security incidents, reducing response time.
- Managed Active Directory accounts and permissions and supported on-site and remote users.
- Contributed to continuous security improvement projects and internal policy updates.

Earlier experience

IT Infrastructure Assistant — Varejocar (Aug 2021 – Apr 2022) and Sabium Sistemas (Jan 2021 – Jun 2021): server, network and Windows Server support; availability monitoring and escalation.

Systems Assistant — Aquário (Jan 2020 – Oct 2020): Senior ERP support, SQL queries for data analysis and C++ customizations.

PROJECTS AND LABS

ThreatLens: Open-source malware analysis meta-aggregator (Python, FastAPI, Docker) that queries VirusTotal and MetaDefender in a single interface, with caching, history and an API. github.com/Viscond-Rosfield/framework-security

SecureWatch: Browser-based threat analysis platform: URLs (VirusTotal, URLhaus), hashes and files, IP reputation and CVEs. viscond-rosfield.github.io/securewatch-

CompTIA Security+ SY0-701 Anki deck (PT-BR): Portuguese translation of a Security+ flashcard deck, shared with the community.

Wazuh SIEM lab: Study environment with Wazuh collecting and analyzing Windows and Linux events, mapped to MITRE ATT&CK, plus traffic analysis with Wireshark and Nmap. Repository: github.com/Viscond-Rosfield/blue-team-portfolio

CERTIFICATIONS

ISO/IEC 27001:2022 Information Security Associate — SkillFront — Jan 2026
SOC Analyst (IC-SOC-380) — IBSEC — Brazilian Cybersecurity Institute — Jan 2026
Junior Cybersecurity Analyst Career Path — Cisco Networking Academy — Jan 2026
C3SA Premium Edition — C3SA Cyber Security & Audit — Feb 2025
Cybersecurity — FIAP — Oct 2024

EDUCATION

Postgraduate Specialization in Cybersecurity — Faculdade Metropolitana — 2025 – 2026
Associate Degree (Technologist) in Systems Analysis and Development — UniCesumar — 2019 – 2021

ADDITIONAL TRAINING

NIST-based Incident Response Fundamentals (Udemy, 2025) · Microsoft Intune: device management and endpoint protection (Microsoft Learn, 2025) · Cybersecurity Awareness (IBSEC, 2025) · Nmap and Wireshark for Network Security Monitoring (Udemy, 2025) · Server and Network Services Administration (Udemy, 2023) · Linux Essentials and Linux Fundamentals (4Linux, 2022) · Cloud Fundamentals (4Linux, 2022) · Shell Scripting I and II (Alura) · SQL (Softblue, 2020)
